EDUCATION

University of California San Diego

San Diego, CA

Bachelor of Science in Mathematics and Computer Science GPA: 3.78/4.00

Expected June 2027

- Selected Coursework: Data Structures & Algorithms, Differential Equations, Linear Algebra

PROFESSIONAL EXPERIENCE

Cofounder & Technical Lead

Jan 2025 – Present

Arya Electric LLC

Orange County, CA

- Built and launched AryaElectric.com (Next.js, React, TypeScript, Tailwind), attracting 300+ active users and serving as the company's primary client acquisition channel.
- Developed internal CRM, scheduling, and automation pipelines, reducing manual workflows by 50%.
- Applied data-driven optimization techniques (structured data, A/B testing, targeted campaigns), driving a 25% MoM increase in inquiries and generating 60+ inbound leads in the first quarter.
- Scaled infrastructure to support 80+ concurrent client service requests, ensuring system reliability.

Software Engineer (Project Lead)

Jan 2024 – Sep 2024

DormDuos.com (Student-founded platform)

Riverside, CA

- Launched DormDuos.com, a full-stack housing platform (React, Node, MongoDB) serving 26,000+ UC Riverside students, with 300+ early users testing roommate matching and housing discovery features.
- Developed secure authentication and role-based authorization (JWT + bcrypt), securing 100% of user accounts and protecting sensitive data.
- Deployed on cloud infrastructure (Vercel, Railway, MongoDB Atlas) with 99%+ uptime, scaling to support hundreds of real-time concurrent users and designing optimized database schemas and queries for low-latency performance

Software Development Team Lead

Sep 2024 – Dec 2024

Battlestar RPG (Collaborative Project)

Remote

- Directed a 5-member engineering team on a collaborative C++ game engine, driving collaboration and code quality across 600+ commits with GitHub workflows, PRs, and peer reviews.
- Engineered adaptive gameplay systems including XP progression, inventory management, and deterministic save/load, improving scalability and persistence under real-time gameplay conditions.
- Implemented automated unit and integration testing infrastructure with GoogleTest, achieving 90%+ coverage to improve release reliability and reduce defects

STEM Tutor (Math & CS)

Jul 2024 – Jun 2025

University of California, Riverside

Riverside, CA

- Tutored 400+ students in Data Structures, Algorithms, and core Mathematics, strengthening coding fluency and algorithmic problem-solving skills.
- Led hands-on debugging workshops in C++ and Python, teaching recursion, memory management, and performance optimization.
- Facilitated group sessions on software design patterns and scalable architectures, reinforcing best practices for industry-ready software development.

Hardware Intern (Seasonal)

Jun 2021 – Sep 2023

ProCustom Group

California, USA

- Executed custom hardware modifications for corporate and government clients, ensuring compliance with strict security standards.
- Diagnosed and repaired laptops/desktops, replacing critical components (boards, displays) to restore full system functionality under QA testing.

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, TypeScript, Java, HTML/CSS, MATLAB

Frameworks & Tools: TensorFlow, PyTorch, Flask, React.js, Node.js, Express.js, Tailwind, Next.js, MongoDB, Git/GitHub, REST API, pandas, Vim

Concepts: Data Structures, Algorithms, Software Design, Databases, Web Security, Agile Development, AI
